The following is an examiner's statement of reasons for allowance: the prior art of record either taken singularly or in combination fail to disclose the limitation that wherein a clearance between the thin slits in the width direction of the porous body sheet changes flexibly in accordance with the change in width of the porous body sheet (claim 1) or a clearance between a plurality of flow paths on the evaporating part side is wider than that on the condensing part side in connection with that the width of the wick is wider on the evaporating part side (claim 14). Also see Applicant's Remark filed 1/25/07. Reference to Peck is the closest prior art, however, Peck discloses a constant width of wick.
